EXPERIENCE

Hexaware Technologies Ltd

Sales Cloud Implementation for a medical device manufacturer company in US

📅 Sept 2022 – Jun 2023   📍 Chennai, India

- Over **2+** years of experience in Salesforce with involvement in diverse projects.

- Sales Cloud Implementation for a medical device manufacturer company in US. Building solutions for the sales process team of the client company to improve their daily sales activities experience and increased the number of sales by **20 Percent for 5 months in a row**.

- Worked on implementing Validation Rules using Apex and Flows. Also created Test Classes for the Apex.

- Developed **LWC** to display object and field metadata definition on the UI for export purpose and developed a solution to fetch picklist values of standard and custom objects.

- Utilized Salesforce **Flows** for seamless process automation, enhancing operational efficiency.

- Developed **Batch Apex** classes to update and meet business requirements, ensuring data accuracy and integrity. Ensured compliance with **Salesforce governor limits** to maintain system performance and stability.

- Utilized **Vlocity Omnistudio** to develop low-code/no-code solutions, effectively meeting diverse business requirements while minimizing development time and complexity.

- Implemented **Copado Robotic Testing** scripts for automated testing, reducing manual efforts and increasing reliability.

ACHIEVEMENTS

- **2 Star Ranger** on Salesforce Trailhead.
- Developed **8+** personal projects using Salesforce tools to showcase knowledge.
- Secured **3rd Position** in Hackathon conducted at college level.

TECHNICAL SKILLS

- **Languages/Frameworks/Libaries**

Secondary - 8.4 CGPA

Army Public School, Ahmednagar

📅 2016   📍 Ahmednagar, Maharashtra

PROJECTS

BMI Calculator

- **LWC | HTML | CSS | JS | SDLC**
- Developed a **Body Mass Index (BMI)** calculator application using Salesforce tools and successfully hosted it on the Experience site, showcasing proficiency in Salesforce development and practical application of web-based solutions.

Alarm Clock

- **LWC | HTML | CSS | JS | SDLC**
- Designed and developed an Alarm Clock Application using Salesforce tools, hosted on an Experience Site, featuring functionality to ring alarms as per user settings. Incorporated images and ringtones stored in static resources for enhanced user experience and customization.

Currency Convertor App

- **LWC | HTML | CSS | JS | APEX | SDLC**
- Developed a Realtime Currency Converter Application using Salesforce tools and integrated **APIs** to fetch up-to-date currency values, subsequently hosting the application on an Experience site for seamless access and usability.

Weather App

- **LWC | HTML | CSS | JS | APEX | SDLC**
- Developed a real-time weather forecasting application using Salesforce tools, integrated with **APIs** to collect and display updated weather information. Hosted the application on an Experience site, allowing users to input locations and retrieve real-time details such as temperature, humidity, and weather conditions.

- **Batch Apex**

Tools And Softwares

- **JIRA**
- **Postman**
- **VS Code**
- **Postman**
- **Data Loader**
- **Copado**
- **GIT/GITHUB**

CERTIFICATIONS

- **Salesforce Certified Administrator**
- **Salesforce Certified Platform App Builder**
- **Salesforce Certified Associate**
- **Salesforce Certified JavaScript Developer I**
- **Salesforce Certified Omnistudio Developer**
- **Microsoft Azure Fundamentals AZ-900**
